Hi Cezary,

Thank you for your explaining on this according to ISO standard. I think that I understand your meaning. Your main concern should be that at least the compiler should throw an warning to tell developers this potential issue, right? Could you please give Microsoft feedback via <https://connect.microsoft.com/visualstudio> so that our product team can hear your voice and improve our product? You may also be able to get email notifications when Microsoft product team responds you.

If you have any other questions or concerns, please feel free to let me know. It is my pleasure to be of assistance.

Have a nice day!

Best regards,
Charles Wang
