The warning message i get is :
ebug/limitedconveters.exe : warning LNK4084: total image size 427905024 exceeds max
(268435456); image may not run

If the number of nodes in the graph ar around 7000 it gives me this warning message , but ultimately gives me results. If the number of nodes are increased to 10000 it does not give me a result. Is there a way around this problem.Thankyou for your help.

Arush:

It sounds like you are creating an array of nodes on the stack. You should have them on the heap.

Could you show some code?
