I am sorry,perhaps my English is very poor.

1) I mean its extent is from -5 to 205 at y-axis(I can do it),look:

```
{  
VARIANT var;  
m_ctlMSChart.GetPlot().GetAxis(1,var).GetValueScale().SetMaximum(205);  
m_ctlMSChart.GetPlot().GetAxis(1,var).GetValueScale().SetMinimum(-5);  
}
```

and now I want to draw a line at 135 of y-axis(I can't do it),

if I write this sentence,it draw a line at 100 of y-axis,look:

```
{  
m_ctlMSChart.GetPlot().GetAxis(1,var).GetValueScale().SetMajorDivision(2);  
}could you tell me how to draw at 135 of y-axis?
```

2)could you tell me in detail about 'stacking' property?

Thank you very much.
