Hello,

I know that the way to open an ie window is the next one:

```
CString strUrl = "http://www.msdnbrasil.com.br/";
if(ShellExecute(miHandle, "open", strUrl, NULL, NULL, SW_SHOWNORMAL)
<= HINSTANCE(32))
{
//erro
}
```

but I need to change its position and size. I've tried SetWindowPos, but I can't guess the first parameter. Can someone help me? Thanks in advance.
