Hi,

Thanks for replying. I got an error message while trying to download IEhelper.exe

ERROR

The requested URL could not be retrieved

While trying to retrieve the URL:

<http://download.microsoft.com/download/ie4095/iehelper/1/win98/en-us/iehelper.exe>

The following error was encountered:

Unable to forward this request at this time.

This request could not be forwarded to the origin server or to any parent caches. The most likely cause for this error is that:

The cache administrator does not allow this cache to make direct connections to origin servers, and
All configured parent caches are currently unreachable.

Footprint 3.0/FPMCP
