The rest just waiting for the created process to complete and then shutdown.

```
if( ProcessInformation.hProcess )
{
    DWORD Ret = WaitForSingleObject( ProcessInformation.hProcess,
    INFINITE );
    DWORD ExitCode;

    GetExitCodeProcess( ProcessInformation.hProcess, &ExitCode );
    GetExitCodeThread( ProcessInformation.hThread, &ExitCode );
    CloseHandle( ProcessInformation.hProcess );
    CloseHandle( ProcessInformation.hThread );
}
else
{
}
return 0;
```
