Ali

one thing more, In your example, you created you own slides first and then run slide show. In my example, I am opening existing presentation file and then run slide show. What happens in my my case, when I run slideshow, ppt file is also opened in powerpoint window in background, In your case it doesn't happen because you are creating slides on the fly.

My question is how to hide powerpoint application running in background that shows ppt file in design mode.

Still not success with full screen presentation form that appears on screen for some time.

Waiting for your reply.

Thanks,
Ajay

Ali,
Fantastic !!!

I was only missing SetWindowPos function call. Seems my all problems are solved. I also struggling with how to hide presentation form , still no success.

Thanks,Ajay

Thanks Tom. I just can't figure out how to keep the presentation from showing fullscreen for a second. If you run the sample and press the button, you will see it flash for a second.

Re: Embed Powerpoint window inside window / dialog

I have been wondering if I can have it start offscreen first.

Here is a sample.

<http://www.learnstar.com/AliR/PowerPointSample.zip>

The only problem right now is that the presentation window flashes on the screen for a split second as a full screen window. I am working on that part, but this should be a good start. Run the sample exe and press the "Push me" button and you will see a two page presentation in the middle of the dialog. The example was written using VS 2003.

I have been trying to put together an example for you, but the problem that I have run into so far is the fact that the persentation is fullscreen, and I can't figure out a way to change that setting.

But not very much helpful to me. I had already worked on this thing, Setting parent didn't work out. I guess we need to something extra to accomplish it.

Thanks,
Ajay

OK,
I've
never
tried
to
do
this,
but
perhaps
this
will
work
for
you
(I'm
hoping
Ali

Re: Embed Powerpoint window inside window / dialog

Re: Embed Powerpoint window inside window / dialog

didn't
already
post
this
:o)
It
looks
to
me
from
the
VB
code
like
it's
just
changing
the
PowerPoint's
parent
window
to
be
that
of
the
form.
This
article
talks
about
how
to
get
that
window
handle.

Hi
Tom
and
Ali,
I
already
went
through
these
articles
and
created
demo's.
This
example
doesn't
fit
to
my
need
as
I
want
to
show
slideshow
inside
a
dilalog
or
inside
my
frame.

Please
follow
this
link
where
slideshow
has
been
shown
inside
a

frame
control.

<http://skp.mvps.org/vb/pptvbwnd.htm>

But
this
thing
is
done
in
VB,
I
want
to
imitate
it
in
MFC
for
a
dialog
or
a
win32
window.
I
don't
want
to
open
PowerPoint
in
another
window,
I
want
to
embed
activex
control
(
if
it
is
there
?)

Re: Embed Powerpoint window inside window / dialog

inside
a
dialog
which
is
created
by
my
application.
My
dialog
should
act
as
a
host
window
for
slideshow.

I
hope
its
pretty
much
clear
to
you
guys.

Thanks,
Ajay
