Just wanted to say thank you for all your comments on this thread. As suggested have been searching around for some implementations of this and found one that looks pretty simple to implement.

If anyone would care to comment, the link is:

<http://msmvps.com/blogs/vandooren/archive/2007/01/05/creating-a-thread-safe-producer-consumer-queue-in-c-w>

Taking the precautions into consideration, this looks like what I wanted to do, and may work well for me.

Many thanks,
Marcus
