Also make sure you don't have any calls to `app.set_Visible(TRUE);`

Ali

one thing more, In your example, you created you own slides first and then run slide show. In my example, I am opening existing presentation file and then run slide show. What happens in my my case, when I run slideshow, ppt file is also opened in powerpoint window in background, In your case it doesn't happen because you are creating slides on the fly.

My question is how to hide powerpoint application running in background that shows ppt file in design mode.

Still not success with full screen presentation form that appears on screen for some time.

Waiting for your reply.

Thanks,  
Ajay

Ali,  
Fantastic !!!

I was only missing `SetWindowPos` function call. Seems my all problems are solved. I also struggling with how to hide presentation form , still no success.

Thanks,Ajay

Re: Embed Powerpoint window inside window / dialog

Thanks Tom. I just can't figure out how to keep the presentation from showing fullscreen for a second. If you run the sample and press the button, you will see it flash for a second.

I have been wondering if I can have it start offscreen first.

Here is a sample.

<http://www.learnstar.com/AliR/PowerPointSample.zip>

The only problem right now  
is that the presentation

Re: Embed Powerpoint window inside window / dialog

window flashes  
on the  
screen for a split second as a  
full screen window. I am  
working on  
that  
part, but this should be a  
good start.  
Run the sample exe and  
press the "Push me" button  
and you will see a  
two  
page presentation in the  
middle of the dialog.  
The example was written

I have been  
trying to put  
together an  
example for  
you, but the  
problem  
that I have  
run into so  
far is the  
fact that the  
presentation  
is  
fullscreen,  
and I can't  
figure out a  
way to  
change that  
setting.

OK,  
I've  
never  
tried  
to  
do  
this,  
but  
perhaps  
this  
will  
work  
for  
you  
(I'm  
hoping  
Ali  
didn't  
already  
post  
this  
:o)

Re: Embed Powerpoint window inside window / dialog

It  
looks  
to  
me  
from  
the  
VB  
code  
like  
it's  
just  
changing  
the  
PowerPoint's  
parent  
window  
to  
be  
that  
of  
the  
form.  
This  
article  
talks  
about  
how  
to  
get  
that  
window  
handle.

Re: Embed Powerpoint window inside window / dialog

Hi  
Tom  
and  
Ali,  
I  
already  
went  
through  
these  
articles  
and  
created  
demo's.  
This  
example  
doesn't  
fit  
to  
my  
need  
as  
I  
want  
to  
show  
slideshow  
inside  
a  
dilalog  
or  
inside  
my  
frame.

Please  
follow  
this  
link  
where  
slideshow  
has  
been  
shown  
inside  
a  
frame  
control.

Re: Embed Powerpoint window inside window / dialog

<http://skp.mvps.org/vb/pptvbwnd.htm>

But  
this  
thing  
is  
done  
in  
VB,  
I  
want  
to  
immitate  
it  
in  
MFC  
for  
a  
dialog  
or  
a  
win32  
window.  
I  
don't  
want  
to  
open  
PowerPoint  
in  
another  
window,  
I  
want  
to  
embed  
activex  
control  
(  
if  
it  
is  
there  
?)  
inside  
a  
dialog  
which  
is

Re: Embed Powerpoint window inside window / dialog

created  
by  
my  
application.  
My  
dialog  
should  
act  
as  
a  
host  
window  
for  
slideshow.

I  
hope  
its  
pretty  
much  
clear  
to  
you  
guys.

Thanks,  
Ajay
