Karim,

I did a quick & dirty console project with your enum. It compiles fine with VC2005 using default debug and release settings.

IMO, you should forget all errors other than the very first one until it is fixed. You may find that the other errors are fixed once you solve the problem indicated in the first.

Copy the project and start cutting out unrelated code until you have the simplest possible project to work with.

The other comments regarding character case and choice of words make a lot of sense. If nothing else, using 'ALIGNMENT', 'TYPE', 'CLASS', 'CASE', etc as identifiers is **really** bad style.

"karim" <karim@xxxxxxxxxxxxxxxxxxxxxxxxxxxx> wrote in message <news:3DA31799-1B3E-4DD7-BBB8-C9C0B31D3377@xxxxxxxxxxxxxxxxxxxx>

hi,
i have problem with my release build(my debug build compiled successfully).
All errors are pointing to a single statement, which is below.

```
static enum  
Value{BASE,ALIGNMENT,ORIENTATION,SIDE,TYPE,SCALING,BARCODE,CLASS,ACCESS,OVER  
STYLE,CASE,COLOR,HORIZONTAL,VERTICAL,FILLCOLOR, FILLSTYLE, FOLD,  
SOURCE};
```

The kind of errors i am getting are
Error 1 error C2143: syntax error : missing '}' before
'constant' c:\migration sandbox\simptr\include\ValueTable.h 48

Error 3 error C2059: syntax error : 'constant' c:\migration
sandbox\simptr\include\ValueTable.h 48

Error 26 error C2065: 'FOLD' : undeclared identifier c:\Migration

Re: release build failed!!!

SandBox\SimPTR\source\XFSPrinterMediaParser.cpp 69

There are 113 errors and all are of the above kind and pointing to same statement.

Can anyone help me out.
thanks in anticipation.
karimulla.
