Because it is a CEditView, it has a document, and when you modify the view (by setting the text) the CEditView will mark the document as modified. Since it is read-only, what you will want to do in your OnClose handler is call SetModify/SetModified (I never remember the name without looking it up) to mark the document as "unmodified".

Hi All,

In have a view obtained from CEditView with readonly property set .
Every time I close the view I get an message saying "Save changes to CView1" with Yes , No and Cancel buttons
But I dont want this messagebox to popup
How do I hide this messagebox ????
