Robin

Why do you want to restore? Have you lost data files?

"I am running Vista 32bit. My PC has two hard disks and I backup to the second one drive D.

I have had a problem that resulted in reloading Vista.

When I now try to restore the backup it says "files made on a different computer – there are no backups on this computer".

I can see the backup on drive D!!

How can I restore the files?

Thanks,

Rob
