Linux didn't  
originate on  
some  
distant  
planet and  
made its

Human

Linux is

You cannot  
be this  
stupid,  
blind and  
naive. But  
maybe you  
are all of  
that with a  
total  
brainwashing.

I didn't think you could  
substantiate your FUD. All  
you can do is hurl  
unfounded insults. Ho hum.

I can't help it if the truth hurts. If you can't  
stand the heat, then get out of the kitchen,  
Alias.

When you post the truth, I'll alert the media.

No insults there. It is FUD and Carey is a shill.

Now the insults continue:

You have total brainwashed yourself, and  
you have not given any evidence as to why  
Linux is not swiss cheese just like any other  
O/S in the wrong hands.

You got all kind of excuses Alias -- (The  
Excuse - Alias), and you always go into a  
tap dance, jig and spin.

More insults but no proof. How surprising.

Alias

Its truly amazing that someone like Alias responds to a post titled  
"How well does the Windows Vista Firewall work" and has absolutely  
nothing informative, relative or intelligent to offer. What a waste of time!

It's NOT amazing how your ilk can only come up with insults and no proof.

That would be you mr liar, mr troll. You've getting a good and well deserved asskick and seem oblivious to  
that fact. You must be even dumber than anyone originally thought...if that is even possible.  
Keep it up, it's now entering the realm of 'unbelievable'!...LOL!
