PROBLEM NOT SOLVED!!!

OK that didn't work, I still have this problem!

I've set my screen saver as blank and haven't had the problem again, is there a fix?

"goorambatman" wrote:

Yep that's what I did and it worked so far, so good.

"mikeyhsd" wrote:

when you go to install the drivers.  
do the UNINSTALL first.  
reboot.  
then install the newer drivers.

When screensaver initiates system crashes and computer restarts. Has never happened before, I can't think of any recent system changes to cause this, I will go to ATI and re-install Catalyst Control Center and drivers, will keep you posted.

My device is a 512KB ATI Radeon X1300.
