It is not done through Windows Update. Here is the Direct link for that download for Vista x86 systems

Let us know how you made out. Make sure you take a note where it will download to on your C:\

To repair this error run the following Tool

<http://support.microsoft.com/kb/947821/>

As described in

Hi Peter,

I'm supposed to download that tool to fix my problem, but getting the tool is done via Vista Updates, (as per tool instructions), and I CANNOT get updates in the first place. Is that tool available on a CD? I would gladly pay for it, if it would help me.

Thanks again for your response.
