Hi, Capi.

This pops up when i try to open Control Panel>>Administrative tools>>event viewer:

"MMC can't open the file C:\Windows\System32\eventvwr.msc

This works for me. It does require me to enter the Administrator password after I click Event Viewer. I get the same prompt if I right-click and choose Run as Administrator.

Do you see the Administrator prompt? Or do you get that error message without seeing a prompt?

RC

Hello!

I have a problem with my DELL XPS M1530 running Windows Vista Home Premium SP1.

Main problem:

This pops up when i try to open Control Panel>>Administrative tools>>event viewer:

"MMC can't open the file C:\Windows\System32\eventvwr.msc

Re: Eventvwr.msc doesn't open

This may be because the file does not exist, it is not an MMC console, or was created by a later version of MMC. This may also be because you do not have sufficient access rights to the file."

I have tried everything that I know about to solve this problem. I have googled the problem, and came up to the solution of running "regsvr32 msxml3.dll". When i run regsvr32 msxml3.dll(on some forums i have read it should be the solution) I get another new error code:

"Msxml3.dll was loaded but the call to Dll Register Server failed with error code 0X80070005.

Search the internet with error code matching, for more information on this issue."

When i typed "regsvr32 msxml3.dll" in command prompt(running comand prompt as administrator) and pressed enter i get the message "DllRegisterServer in msxml3.dll was succesfull"
But no fix to the problem neither.

I even runned command promp and typed "sc query eventlog"(eventlog is the service name of eventviewer) and there seemed to be no problem. But no way to open it. I then rebooted my computer, but it didn't even open then. Later i found out there is still one way to see the event log, but not open the file. I open Computer Management by right-clicking the Computer icon on the start menu and select Manage. There i do find event viewer. But the other way to open it seems to not work.

I really need help,

best regards,

-capi
