It would have been helpful if you had disclosed what your preferred email service is. If your only email service is a free Yahoo account that you access via your browser, that is pretty limiting, but you might try their procedure for setting Yahoo's webmail as the default in Vista:

<http://help.yahoo.com/l/us/yahoo/mail/classic/settings/settings-10.html>

Any problem with that procedure should be referred to Yahoo, but with a free email account the amount of help you get from the provider usually matches what you pay them.

In the long run you would be better off using a supported POP email account provided by your ISP.

I'm trying to send my resume through "craigslist" it will not let me. it's asking for my incoming mail pop3 or imap server and smtp outgoing e-mail. this maybe the "stupied" question of the day. are they referring to my yahoo e-mail address???? if not were do i find this on my computer???
