It sounds like you have a corrupted message store. The easiest way to fix that is to upgrade to the newer Windows Live Mail, which will import everything from your Windows Mail.

After I finally imported most of my email from express, I get a recovered email box every time I open my mail can't find how to turn off. Also, must enter email name and password every time I open, express allowed me to turn this feature on and off as desired.

Any suggestions, anyone?
