There is nothing you can do for individual profiles in that regard, as far as I know anyway, but this –might– be of some help to you.

'Quickly Change Your Resolution & Color Depth – FastRes'  
(<http://www.southbaypc.com/FastRes/>)

This way, you can change the resolution much more quickly, in two or three clicks.

ps I don't know if this program works in Vista, I've never used it. If not, I'm sure something similar does.
