more info...

I have turned off the Firewall as we have our own.  
I can access the folder structure on the primary domain controller, and its backup, but can see none of the file sharing servers. When I try, I am prompted with a login box, and though I am logged onto the primary domain, and authenticated with my administrator credentials, I put in the same credentials in the authentication box and it tells me they are incorrect. I have shared a folder on the Vista Pc and am able to see it from an xp computer.

## Windows IP Configuration

Host Name . . . . . : HORIZON  
Primary Dns Suffix . . . . . :  
Node Type . . . . . : Hybrid  
IP Routing Enabled. . . . . : No  
WINS Proxy Enabled. . . . . : No

## Ethernet adapter Local Area Connection 2:

Connection-specific DNS Suffix . :  
Description . . . . . : Broadcom NetXtreme Gigabit Ethernet  
Physical Address. . . . . : 00-10-18-2E-F5-D1  
DHCP Enabled. . . . . : No  
Autoconfiguration Enabled . . . . : Yes  
IPv4 Address. . . . . : 164.64.84.248(Preferred)  
Subnet Mask . . . . . : 255.255.255.0  
Default Gateway . . . . . : 164.64.84.1  
164.64.53.99  
DNS Servers . . . . . : 164.64.1.2  
164.64.3.5  
Primary WINS Server . . . . . : 164.64.84.5  
Secondary WINS Server . . . . . : 164.64.53.10  
NetBIOS over Tcpip. . . . . : Enabled

## Tunnel adapter Local Area Connection\* 6:

RE: vista pc won't access network shared folders

Media State . . . . . : Media disconnected  
Connection-specific DNS Suffix . :  
Description . . . . . : Teredo Tunneling Pseudo-Interface  
Physical Address. . . . . : 02-00-54-55-4E-01  
DHCP Enabled. . . . . : No  
Autoconfiguration Enabled . . . . : Yes

Tunnel adapter Local Area Connection\* 7:

Media State . . . . . : Media disconnected  
Connection-specific DNS Suffix . :  
Description . . . . . : Microsoft ISATAP Adapter  
Physical Address. . . . . : 00-00-00-00-00-00-E0  
DHCP Enabled. . . . . : No  
Autoconfiguration Enabled . . . . : Yes

Tunnel adapter Local Area Connection\* 9:

Connection-specific DNS Suffix . :  
Description . . . . . : Microsoft 6to4 Adapter  
Physical Address. . . . . : 00-00-00-00-00-00-E0  
DHCP Enabled. . . . . : No  
Autoconfiguration Enabled . . . . : Yes  
IPv6 Address. . . . . : 2002:a440:54f8::a440:54f8(Preferred)  
Default Gateway . . . . . : 2002:c058:6301::c058:6301  
DNS Servers . . . . . : 164.64.1.2  
164.64.3.5  
NetBIOS over Tcpi. . . . . : Disabled

We have a network domain, all XP pro compters, though the domain controller is NT. I have successfully joined this vista pc, and can 'see' all of the computers and servers on the domain, BUT cannot access any of the shared folders.

Can't map to them which is what we usually do, can't browse to them, it asks for a username and password but will not authenticate using good credentials, actually will not even authenticate using the server credentials.

I have exhaustively checked the network settings but do not know where else to look.

I am using our standard network dns, wins, gateway and IP in TCP/ IPV4  
We will soon be moving our 300 pc's to Vista, and this is our test pc, so I need to get this one right before we proceed.

I was wondering if it has to do with active directory? We are planning to move to active directory soon as well.

.
