It could be compatible issue. Have you upgrade the driver or firmware for the NIC and router?

Vista incompatible issues

Vista Incompatible issues. 1. Some switches or routers may not compatible with Vista Solutions: upgrade the firmware, disable the IPv6, re-configure the ...

Hi,

I've got a network at home. 3 Computers are on it, including this computer with vista (the others have xp). The problem is, that every 1-2 minutes my internet goes off and on. I have this in games, but also when i browse on internet.

I checked that the computer can't turn off the thing, because of energy save, and that is off. So it's not that.

Anyone has some ideas?,

Thanks.
