I tried networking my vista laptop with my xp desktop but i have two issues:

- 1) My vista machine wont show up in the xp network places.
- 2) The xp machine shows up in the vista network sharing but i get thiserror when i double click it to access the files "Logon Failure: the user has not granted the requested logon type at this computer."

Re: Logon Failure: the user has not granted the requested logon type at this

The workgroups are the same on both machines and i'm connecting wirelessly to a router from vista but wired from the router to xp.

Please help.
