Hi all

I am using VISTA 32 bit home premium with bit defender total protection 2008 as antivirus software. But one day suddenly task manager is not working. The error reported was task manager is closed due to DEP. Can u guys help me out in figuring what happend. Is that a virus attack or malware. Do i need to install any other antispy softwares. How canI correct this problem without a factory restore??? Please help

Thanks

Rocky:cool:
