The image editor is intended to draw on bitmap or icon resources, not in forms. In your case, you can override the OnPaint procedure and make your drawings there. For example (VB.NET):

```
Protected Overrides Sub OnPaint(ByVal e As
System.Windows.Forms.PaintEventArgs)
    e.Graphics.DrawLine(System.Drawing.Pens.Blue, 0, 0, 100, 100)
End Sub
```
