RE: publish web site from command line

| Hi Steven,
| thanks for your answer. I knew about the web deployment project, and in fact

| this is what I would like to use. But unfortunately it currently does not work for me:

| <http://forums.asp.net/1123813/ShowPost.aspx>

| I will therefore have a look at aspnet_compiler.exe. I do not need to publish to a remote site, but only to a local directory.

| Thanks and best regards,
| Martin
