Hi Kevin,

Upon further investigation, I discovered my initial reporting was not exactly correct however this is still a problem.

It seems the problem only occurs when alternating developers.

ie: I created the project, checked it in. Developer #2 opens the project, its automatically checked out. He checks in his changes. I open the project again, do a GET and the web development project is checked out again (still the only thing checked out).

I hope this is of some help in tracking down the problem.

On another note, is there an ETA to VS2005 SP1?

Thanks,

Hi Steven,

This is really weird. Are all the files checked out or only the project file checked out? Please try the following to see if it works:

1. Do a Get Latest Version on the whole solution.
2. Check in everything. Make sure pending check-in windows is empty after this check-in.

Are the files checked out again?

3. Build the whole solution.

Are the files checked out again?

RE: Web Deployment Project always checked out

4. Close the solution.
5. Open it again.

Are the files checked out again?

<http://msdn.microsoft.com/subscriptions/managednewsgroups/default.aspx#notifications>.

Note: The MSDN Managed Newsgroup support offering is for non-urgent issues where an initial response from the community or a Microsoft Support Engineer within 1 business day is acceptable. Please note that each follow up response may take approximately 2 business days as the support professional working with you may need further investigation to reach the most efficient resolution. The offering is not appropriate for situations that require urgent, real-time or phone-based interactions or complex project analysis and dump analysis issues. Issues of this nature are best handled working with a dedicated Microsoft Support Engineer by contacting Microsoft Customer Support Services (CSS) at  
<http://msdn.microsoft.com/subscriptions/support/default.aspx>.
