Hi Gary,

All I'm doing is adding these (tried both):

```

<asp:Image ID="Image1" ImageUrl="~/App_GlobalResources/images/logo.gif"
runat="server" />
```

Neither works. The URL resolves correctly, if I look at the page rendered and check the properties of the placeholder. I've tried putting the image in another directory, including the root in case it was a permission issue. No dice.

Regards,

Richard Hein
