Hi,

I am afraid the VS2005's SQL Server Express edition is unable to be installed as a default SQL server instance.(It even could not be done via the VS2005's UI setup program)

By the way, we don't recommend to install a SQL Server Express edition as a machine's default SQL server instance.

Thanks for your understanding!

Best regards,

Gary Chang

Note: The MSDN Managed Newsgroup support offering is for non-urgent issues where an initial response from the community or a Microsoft Support Engineer within 1 business day is acceptable. Please note that each follow up response may take approximately 2 business days as the support professional working with you may need further investigation to reach the most efficient resolution. The offering is not appropriate for situations that require urgent, real-time or phone-based interactions or complex project analysis and dump analysis issues. Issues of this nature are best handled working with a dedicated Microsoft Support Engineer by contacting Microsoft Customer Support Services (CSS) at
<http://msdn.microsoft.com/subscriptions/support/default.aspx>.
