-

I created a fresh addin outlook add-in with a simple message box on the ThisApplication_Startup event. However the event will not fire in debug. When I check the COM-Addins section, the add-in is not checked. I made sure the project configuration is in debug mode. I have also removed VSTO, 2.0 framework, and SDK and reinstalled them all.

Any ideas?

Here's the debug code:

'Outlook.exe': Loaded 'C:\Program Files\Microsoft Office\OFFICE11\OUTLOOK.EXE', No symbols loaded.
