Server Explorer giving me the following error when I click any node under Crystal Services. (Visual Studio 2003)

Client found response content type of 'text/html', but expected 'text/xml'.
The request failed with the error message:

```
--  
<html><head><title>Error</title></head><body>The system cannot find the path  
specified.  
</body></html>
```

```
--.  
I am attempting to follow an MSDN article located at  
http://msdn.microsoft.com/msdnmag/issues/02/05/Crystal/default.aspx  
I appreciate any help offered.  
TIA  
Jon
