Why not have a new Access database which links the tables from both the SQL and Access database?

Ok, i have tried many times now for a solution, but i guess explaining the problem is the hardest part,

However i came closer to a solution so here goes:

I have 2 DB's.

1=SQL (CRM)

2=Access (Project details)

These DB's are third party DB's so i CAN NOT make stored procedures on them, or extra table etc. i can ONLY Query them.

I have made a dataset page containing queries of these 2 databases. (oh BTW im using visual web developer Express)

First one(CRM) has this query:

```
SELECT dbo_tForecastFF.lFieldID, dbo_tForecast.lForecastID,
dbo_tContactPersoon.lContactID, dbo_tContactPersoon.sNaam,
dbo_tForecastFF.sData FROM (((dbo_tContactPersoon INNER JOIN
dbo_tForecast ON dbo_tContactPersoon.lBedrijfID =
dbo_tForecast.lBedrijfID) INNER JOIN dbo_tBedrijf ON
dbo_tContactPersoon.lBedrijfID = dbo_tBedrijf.lBedrijfID) INNER JOIN
dbo_tForecastFF ON dbo_tForecast.lCounter = dbo_tForecastFF.lKey)
WHERE (dbo_tForecast.lForecastID = ?) AND
```

Re: Still can't solve this, multiple database query pls help.

Re: Still can't solve this, multiple database query pls help.

```
(dbo_tContactPersoon.IContactID = ?) AND (dbo_tForecastFF.IFieldID = 26)
```

The IForecastID comes from a textbox the user fills in.

Second(project details) has this query to get the ICPID number:

```
SELECT sVarValue  
FROM tAnswers  
WHERE (sVarName = 'ICPID') AND (sKey = ?)
```

sKey is same as project number so can come from the same textbox the user enters..(or another solution from here on of course)

I CANNOT make an inner join saying ICPID=IContactID inside dataset cause ICPID=string and IContactID=integer. (i get an error when i try to do this in dataset)

What i want to do in the end: Display the contacts name (called sNaam in first query) inside a textbox.

What i DONT know how to do: how to use the ICPID result from the second Query, inside the first query for IContactID to get sNaam result..

Hope i am clearer with explaining the problem this time.

Thanks in advanced for looking into it !
