SOFTWARE:

Visual Studio 2008 Team Database Edition
SQL Server 2005 Enterprise SP2

ERRORS:

"The database that you selected is not supported"

Unable to add data connection.

Could not load file or assembly

'Microsoft.SqlServer.Management.Sdk.Sfc, Version=10.0.0.0, Culture=neutral, PublicKeyToken=89845dcd8080cc91' or one of its dependencies. The system cannot find the file specified.

STEPS TO REPRODUCE:

Data > Schema Compare

New Connection..

Type in all info > select database name (it IS seeing all the databases on the server)

click Test Connection

"Test Connection succeeded"

Click OK

"The database that you selected is not supported"

Does the same thing if I do

New Project > Visual C# > Database > SQL Server Project

Server Explorer

Add New Connection

Error:

Unable to add data connection.

Could not load file or assembly

'Microsoft.SqlServer.Management.Sdk.Sfc, Version=10.0.0.0, Culture=neutral, PublicKeyToken=89845dcd8080cc91' or one of its dependencies. The system cannot find the file specified.

TROUBLESHOOTING STEPS ALREADY TAKEN:

I tried totally uninstalling Visual Studio 2008, 2005, and SQL 2005 Workstation Components/Client Tools..

VS 2008 Team – Database not supported / Can't load file or assembly

Installed Visual Studio 2008

Tried same thing, got same error message.

Installed SQL 2005 Workstation Components / Client Tools

Installed SQL 2005 SP2

Tried same thing, got same error message.

SOLUTION:

Unkown

.
