In news:%23hM9qOQCEHA.3796@TK2MSFTNGP10.phx.gbl,
Al Mulnick <amulnick_No_SPAM@ncDOTrr.com> posted their thoughts, then I
offered mine

> *No. GC's hold read-only copies of directories for other domains.*

> *Their own copy is still writeable (they're a DC and a GC right?).*

>

> *Does that help?*

>

>

>

> *"Madferret" <anonymous@discussions.microsoft.com> wrote in message*

> *news:3D3F7306-49D3-45F7-B698-8D78BD97B4E8@microsoft.com...*

>> *From what i can gather a global catalog DC on holds a readable copy*

>> *of the AD partitons. Does that mean if you stop it from being a*

>> *global catalogue server then*

> *its copy of AD becomes writable again and it will not be queried only*

> *for Authentication*

Unfortunately this was also posted in the win2000.activedirectory newsgroup
where I provided a response. Too bad the poster didn't crosspost this
properly do he would get a better collaboration and discussion among the
responses.

I crossposted this to show him/her how it's done...
