Check out the following tools

If on the DC

net user username

If on a member of the domain the user is in

net user username /domain

If anywhere

getuserinfo domain\username

or

accexp username /s domaincontroller

NET USER is on the machines by default. GetUserInfo and AccExp can be found on the free c++ win32 tools page of [www.joeware.net](http://www.joeware.net).
