Hi Kevin,

OMG, man, it's fixed!!!

You're never going to guess what I did? I ran Ad-Aware (someone else suggested it might be spyware or something)...I ran that, removed all entries it found, rebooted, and tried to join the domain. Sure 'nuff, it worked!

Sun-of-a-beech!!!

I owe you so much for your assistance, thank-you! I know you spent a lot of time helping me work this problem. I truly, TRULY appreciate it...

David
