See when I remove the check mark in the account lockout in one DC it is not immediately replicating to other DC it takes around 30 Secs to replicate to other DC . I also changed the registry value HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Services\NTDS\Parameters registry entry to 30 Secs . But what I want is account lockout & account disabled should be replicated immediately before that 30 Secs . Infact it should be replicated simultaneously . Please Help .
