Hi,

Thank you all for your responses.

strongline – I was able to create the DNS zone, but I got the same error message when I tried to convert the zone to AD-integrated.

Jorges Silva – I followed the recommended steps, however I got the same error message when I tried to recreate the zone (step four).

Jorges de Almeida Pinto – This is the only DC in the domain, and the zone does not exist at all. I am currently following the steps in the windowsitpro.com article – if this meets with no success I shall try the technet article.

Any more suggestions?

Thank you all for taking the time to respond.
