you only need R2 if you use its functionalities. And several functionalities might need a schema update

Im currently planning a migration from 2k to 2k3 --

two questions ?

is it worth on an active directory perspective, to go with r2 ? i have a medium environment with about 250 workstations and users.

i've never seen the switch adprep /domainprep /gpprep -- what is that ? do i run that instead of adprep /domainprep ?

Thanks,

have you done ADPREP /FORESTPREP from CD2?

No? -> do it! ;-)

hello Jorge,

thank you for your information.
unfortunatly i had already checked those points.
i prepared my AD 2000 and checked it successfully.

in fact when i try to promote a windows 2003 SP1 R2 from
member to DCs
in my AD 2000 prepared with adprep, i get the following
message:

"the AD's schema of the source forest is not compatible with
the AD's
version
of this computer" (meaning my windows 2003 server)

i don't see why because the preparation is fine..
the adprep/ domainprep is supposed to create new OU and
objets (i don't
know
which one and i didn't see any after the preparation).

could you tell me :

which objet and OU are supposed to be created ?

Re: migration AD 2000 to 2003

a different manner to check the preparation is fine ?
why i get the message of imcompatible version..(my 2 DC
2000 are SP4)

thanks in advance for your answer..

hello,

i'm testing the migration of
an AD 2000 to 2003.

i made adprep /forestprep

Re: migration AD 2000 to 2003

--> ok
adprep /domainprep /gpprep
--> ok (with cd 2003 R2)

normally i'm supposed
being able to put an DC
2003 after
replication
have been done between all
DC servers.

i have already checked in
the ADSI editor the revision
parameters
written
in
the document q309628
(operation performed....)

My question is: i'd like to
know how you can verify
that replication
has
been successful between
DCs, meaning, what do i
must check on the
others
DCs to check that they are
now prepared ?

some OU are supposed to be
created but i don't see
anything.

thanks for any help...

Patrick.
