If you are stating that an intelligent domain admin can figure out how to elevate his privileges

yes, they can.... besides that...everyone with physical access to a DC

Unclear on the capitalization and exclamation point piece of your conversation.

just making a point....

If you are stating that an intelligent domain admin can figure out how to elevate his privileges I don't think that is a good reason. If you have an untrustworthy admin, those privileges need to be revoked and someone found

Re: New Organizational Unit for a new remote office.

Re: New Organizational Unit for a new remote office.

who can do their job as directed.

I'm not going to explain how to, but the message here is:

EVERY DOMAIN ADMIN IN THE FOREST (AND THUS EVERY
DOMAIN IN THE FOREST)
MUST BE TRUSTED!!!

Hunh???

Are you trying to say that a child domain administrator has

Re: New Organizational Unit for a new remote office.

full
Enterprise admin rights?

office
under
an
individual
Organizational
Unit
with
it's
own
administrators,
domain
controllers
and
e-mail
servers.

impossible to achieve when it concerns the
DCs. You cannot delegate
administration of one single DC. Either you
administer ALL DCs or you
don't
DCs should be administered by domain
admins ONLY!

Additional domains in a forest do not give
additional protection when
admins are made child domain admins.

to answer your question you need to know

Re: New Organizational Unit for a new remote office.

WHAT you want to delegate.....examples are:
* password resets
* Account unlocks
* computer joins (how to make sure every computer is unique and has not already been used by other admin)
* creation of groups (how to make sure every computer is unique and has not already been used by other admin)
* creation of users with/without mailboxes (how to make sure every computer is unique and has not already been used by other admin)
* Assign mailboxes to existing users
etc
etc
etc

Hi All

We are a single domain environment and we want to have a setup a

Re: New Organizational Unit for a new remote office.

remote
office under an individual
Organizational Unit with it's
own
administrators,
domain controllers and
e-mail servers.
Can someone please lead
me to any documentations
which state the
minimum
setup required if we want to
delegate their own
administrators to
administrate their own
Organizational Unit ONLY
?
i.e. Preperations and setup
requirements.

Thanks
Peter
