I have the Maximum password age set to 90 days and I'm sure it's working fine
YET the CIO wants to see proof that it's working.
He wants something like an entry in Event Viewer showing the forcing of a password due to the policy.

What can I do?

Make a similar GPO and set the maximum password age very low, i.e. 1 day.
Let the GPO apply to his account and he will notice in less than one day.
