Thanks very much for your suggestion, Paul. The NTBackup command ran successfully.

Thanks.

Diane

Form a command prompt run the command below, make sure you replace USERNAME with the name of the user that is running the scheduled task

```
runas /user:USERNAME cmd
```

This will open up a new command prompt with the same authority as the user in the scheduled task. Try running the ntbackup from this new command prompt.

Thank you for your response, Enkidu. I ran the script from the command line and the backup went through without any problems. Do you have any other suggestions?

Re: NT Backup

Thanks.

Hi Diane,

Just checking, did you try running the script from the
command line to
see if it has errors?

Cheers,

Cliff

Thank you for your prompt response again,
Myweb.

How do you open the Scheduled Task
Console? Thanks.

"Myweb" <meiweb@xxxxxx> wrote in

Hello Diane,

Please try to stop and restart
the services as following:

1. Open services console. 2.
Stop the Task Scheduler and
then restart
it.

If the problem still persists,
would you please help me
collect the
following information:

1. Collect the Scheduled
task log as following:
1) Open the scheduled task
console. 2) Click Advanced
menu and then
select View Log. 3) Please
post the log to newsgroup.
2. Please post the detailed
error message of Event Log
to newsgroup
(if some exists). 3. Create a

Re: NT Backup

new schedule and check if
the problem
still persists.

Thank you
very much
for your
prompt
response,
MyWeb

I opened
Scheduled
Tasks, the
error under
Status was
0x2. If I
right-click
and select
Run now,
the window
pops up and
flashes
quickly
and then
close. I can't
see what the
screen says.

Please let
me know if
you need
additional
information
or have any
questions.

If
you
open
Scheduled
Tasks,
you
can
see
yours
and

Re: NT Backup

maybe
an
error
or
the
status
of
the
task.
What
happens
if
your
rightclick
and
take
run
now?

We
are
running
Windows
2003
server.
This
server
is
a
Domain
Controller.
We
scheduled
the
backup
jobs
using
NTBackup.
However,
the
scheduled
backup
jobs
did
not
run.
Is
there
a
way

Re: NT Backup

to
find
out
why
the
backup
did
not
run?
I
checked
the
Event
Viewer
and
did
not
see
anything
regarding
to
backup.

Have you ever noticed that if something is advertised as
'amusing' or
'hilarious', it usually isn't?
