Paul,

I finally was able to schedule my backup jobs using the Unmanaged method in Microsoft Knowledge Base 239892.

Again, thank you very much for taking time to assist me. I have learned some of the troubleshooting method of NTBACKUP.

Diane

Paul,

I am looking at the Removable Storage MMC. I was wondering if the backup tape needs to be in the Media or Media Pools or Libraries folder. We have an external SCSI tape drive. The tape drive is Compaq AIT 50 GB drive.

Thanks.

So it worked with the account that it won't work with in the scheduled task?

Thanks very much for your suggestion, Paul.  
The NTBackup command ran successfully.

Thanks.

Diane

Form a command prompt  
run the command below,  
make sure you replace  
USERNAME with the name  
of the user that is running  
the scheduled task

runas /user:USERNAME  
cmd

This will open up a new  
command prompt with the

Re: NT Backup

same authority as the user in the scheduled task. Try running the ntbakup from this new command prompt.

Thank you  
for your  
response,  
Enkidu. I  
ran the  
script from  
the  
command  
line and the  
backup  
went  
through  
without any  
problems.  
Do  
you have  
any other  
suggestions?

Thanks.

"Enkidu"

Hi  
Diane,

Just  
checking,  
did  
you  
try  
running  
the  
script  
from  
the  
command  
line  
to  
see  
if  
it  
has  
errors?

Cheers,

Cliff

Hello  
Diane,

Please  
try  
to  
stop  
and  
restart  
the  
services  
as  
following:

1. Open  
services  
console.
2. Stop  
the  
Task  
Scheduler  
and  
then  
restart  
it.

If  
the  
problem  
still  
persists,  
would  
you  
please  
help  
me  
collect  
the  
following  
information:

Re: NT Backup

1.  
Collect  
the  
Scheduled  
task  
log  
as  
following:
  - 1)  
Open  
the  
scheduled  
task  
console.
  - 2)  
Click  
Advanced  
menu  
and  
then  
select  
View  
Log.
  - 3)  
Please  
post  
the  
log  
to  
newsgroup.
2.  
Please  
post  
the  
detailed  
error  
message  
of  
Event  
Log  
to  
newsgroup  
(if  
some  
exists).
3.  
Create  
a  
new  
schedule  
and

Re: NT Backup

check  
if  
the  
problem  
still  
persists.

Thank  
you  
very  
much  
for  
your  
prompt  
response,  
MyWeb

I  
opened  
Scheduled  
Tasks,  
the  
error  
under  
Status  
was  
0x2.  
If  
I  
right-click  
and  
select  
Run  
now,  
the  
window  
pops  
up  
and  
flashes  
quickly  
and  
then  
close.  
I  
can't  
see  
what  
the

Re: NT Backup

screen  
says.

Please  
let  
me  
know  
if  
you  
need  
additional  
information  
or  
have  
any  
questions.

If  
you  
open  
Scheduled  
Tasks,  
you  
can  
see  
yours  
and  
maybe  
an  
error  
or  
the  
status  
of  
the  
task.  
What  
happens  
if  
you  
rightclick  
and  
take  
run  
now?

We  
are

Re: NT Backup

running  
Windows  
2003  
server.  
This  
server  
is  
a  
Domain  
Controller.  
We  
scheduled  
the  
backup  
jobs  
using  
NTBackup.  
However,  
the  
scheduled  
backup  
jobs  
did  
not  
run.  
Is  
there  
a  
way  
to  
find  
out  
why  
the  
backup  
did  
not  
run?  
I  
checked  
the  
Event  
Viewer  
and  
did  
not  
see  
anything  
regarding  
to  
backup.

Re: NT Backup

--

Have  
you  
ever  
noticed  
that  
if  
something  
is  
advertised  
as  
'amusing'  
or  
'hilarious',  
it  
usually  
isn't?
