Hello stevekokx@xxxxxxxxxx,

Did you restart the server? And also post an unedited ipconfig /all from the server please.

Best regards

Meinolf Weber

Ok, now I have the PDC's IP address set as the DNS (with DNS installed on the PDC) and I am still getting the errors. I cannot create a forward or reverse lookup zone – I get Access Denied errors.

Something is seriously screwed up.

Hmm, I can't even create a Forward Lookup Zone, I get

Re: Multiple Access Denied

Access Denied.

Related?

Hello stevek...@xxxxxxxxxx,

Remove them there and configure
forwarders in DNS managent console
under the server properties forwarders tab.

Best regards

In the DNS entries I have
the DNS servers of my ISP.

Is this wrong?
