

microsoft.public.win2000.advanced_server: User policy wont apply

User policy wont apply

Hi,

Ive just set up a group policy in our W2K AD Domain. The User Policy applies perfectly to all clients in the domain apart from mine!

However, if i log onto a different machine the policy applies perfectly

All DNS settings are the same on my PC as the others in the domain.

Are there any settings that will prevent user policy applying to a W2K PC?

Computer Policy is applied with no problems. User policy will not update when i use secedit to force it or when i shutdown, restart and logon again.

Any ideas?
