You might try application compatibility mode.

>From the "Run" box

regsvr32 %windir%\AppPatch\slayerui.dll
to enable application compatibility mode.

| Hi all, i upgraded all my machines to win 2000 a while ago,
| i have recntly found an old CD case full of old win98/95
| games that i loved to play and want to play again (Red
| Alert, System Shock 2, MechCommander 1). I know they wont
| work under 2k as they are designed for the 9x series. Does
| anybody know how i can get them running on this machine?
| Simple is better as my brother has to use it as well and he
| isnt computer literate to a high level (he can still run
| rings around my dad). A friend recomended Virtual Machine
| to me and stick 98se on, how viable is this? How is
| installing 98se on its own partition and doing a OS select
| at start up? Anyone got any ideas?
