You could try opening a pipe with NET USE, something like this:

```
net.exe use \\xxx.xxx.xxx.xxx\ipc$ password /user:domain\user
```

or to specify a local account:

```
net.exe use \\xxx.xxx.xxx.xxx\ipc$ password /user:xxx.xxx.xxx.xxx\user
```

or to be prompted for the password:

```
net.exe use \\xxx.xxx.xxx.xxx\ipc$ * /user:domain\user
```
