Good Morning,

This is an error I am getting on two of my windows server 2003 boxes, and this has been happening for quite sometime now, what is the root cause of this, the KB is very vague.

Event Type: Warning

Event Source: LSASRV

Event Category: SPNEGO (Negotiator)

Event ID: 40961

Date: date

Time: time

User: N/A

Computer: Computername

Description: The Security System could not establish a secured connection with the server DNS/Prisoner.iana.org. No authentication protocol was available.

For more information, see Help and Support Center at

<http://go.microsoft.com/fwlink/events.asp>.

Data: 0000: c0000388

CAUSE

This issue may occur if the File Replication Service (Ntfrs.exe) tries to authenticate before the directory service has started.

WORKAROUND

To work around this issue, ignore these two warning events if the directory service starts successfully. If the events continue to appear after Windows has successfully restarted, you may have to troubleshoot the directory service.
