

Re: The DNS server could not find or open zone file dns

1. Unedited ipconfig /all of your DCs and one sample workstation please
2. The exact zone name spelling in DNS and whether updates are allowed on the zone.
3. The AD DNS domain name as it shows up in ADUC.
4. If the SRV records exist under your zone.

Instead of the website you're using, I suggest to use OEx (Outlook Express or any other newsreader), and configure a news account, pointing to news.microsoft.com. This is a direct link to the Microsoft Public Newsgroups. It is FREE and requires NO ISP's Usenet account. OEx allows you to easily find, track threads, cross-post, sort by date, poster's name, watched threads or subject.

It's easy:

How to Configure OEx for Internet News
