Hi,

We have problem to programatically send fax from a native ordering-system. The clients computers have the shared fax clients installed, and the server had the Shared Fax Server service running – and all works fine with the "Send fax wizard". However, we also wants to use the COM/API method as the Code below – which end in a errorstate.

```
Dim FaxServer As Object
Set FaxServer = CreateObject("FaxServer.FaxServer")
FaxServer.Connect (Server Name)
etc.
```

We have searched the web – and found some contrary information if this is available for the SBS shared fax:

– According to a tread in the microsoft.public.backoffice.smallbiz2000 group – by Sean Daniel [MSFT] – he says: "Sorry, there are no such public APIs (especially no COM APIs) for SBS2k fax"

<http://groups.google.com/groups?hl=no&lr=&ie=UTF-8&frame=right&th=a86c95acb17cb2b&seekm=fce701c1a9e89>

– According to this link the COM/API method is some way supported : <http://members.optusnet.com.au/~hssandler1/fspfaq.htm#Q4>.

– According to this link the COM/API method is supported: <http://msdn.microsoft.com/msdnmag/issues/01/08/FaxServ/default.aspx>

So – We need to find out: – Does or doesn't the Shared Fax in SBS2k support the COM/API method?

Regards
