Already check it too...
Only a warning

"An error was encountered while sending a fax. The service will attempt to resend the fax. If further transmissions fail, please verify that the phone line, fax sending device, and fax receiving device are working properly. Sender: . Billing code: . Sender company: . Sender dept: . Recipient name: newFax. Recipient number: XXXXXXXXXXXX. Device name: Lucent Win Modem.

For more information, see Help and Support Center at <http://go.microsoft.com/fwlink/events.asp>.

....

Can you check the event logs?
Open command shell, type eventvwr.exe and check in Application section for any Fax events.

Unfortunately, the error occurs after the fax submit, so the only thing
I can read is on the "fax monitor" window:
"Dialing XXXXXXXXXXXX
Sending Page 1 of 3
An error occurred while sending the fax"

Re: fxscomex.dll sending tiff document

I lookup on the Fax Console and the Extended Status is set to "Fatal error"!

:S

I've try it with a text file and everything works fine.

I'm gettin gout of ideias to get it working...

Many thanks

Jorge Colaço

Renu Bhattar [MSFT] wrote:

Can you let us know the error code? Also, are you able to send a text file successfully to the same number?

Thanks,

Renu

Hi guys,

I'm working on a c# fax server project and I'm trying to build a tiff

document that I can send to my fax/modem.

Have reading lot of information on the last weeks, and

already have a

tiff with these properties:

- 1bpp indexed format

- Width 1728 pixels

- Horizontal resolution 204 dpi

- Vertical resolution 196 dpi

By now, after execute the ConnectedSubmit() method, the fax/modem

connects to destination and start to send, but, when star to

send first

Re: fxscorex.dll sending tiff document

page it get's an error and abort the operation! :s

Weird... does anyone knows how can I solve this problem?

Many thanks!

Jorge
